The 17% carbon emissions reduction in April 2020 was achieved by shutting down production, working from home and not going to restaurants. Probably only 8% of that is realistically sustainable. My platform this year is about encouraging Generation Z to decrease our population to right size the planet. This would create a glut of housing solving the homelessness problem and put us into an entirely different economic system.

I'm an introvert with very few friends and have never done social media. I've been running my musical blog for a quarter century. I feel that as a transwoman, musician, computer programmer and curry chef in congress, I'll be able to garner attention to my thoughts on climate change action. I don't think we are going to build our way out of this problem. Human activity causes climate change.

I'm very passionate about climate change action and education. I need your support. I want to serve in congress in this capacity. Please consider donating to my campaign and spreading the word.
